DETAILED ACTION

Claims 1-2,4-17 are pending.

Claims 1-2,4-8,11-17 are rejected under 35 U.S.C. 102(b) as being anticipated by compounds in Figure 1 page 1528 of Stinchcomb et al.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 9 and 10 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The disclosure in section [0025] page 7 of the specification fails to provide adequate teachings to make compounds of claims 9 and 10 since the term "modifying " does not provide any reagent(s) and reaction condition(s) to make the claimed compounds. There is no relation can be related the olefin oxide with buprenorphine to form the claimed compounds and particular the R group in Formula (II) and (III) . In addition, due to the bulky structure of buprenorphine, the reaction of the same with olefin oxide requires experimentation to make the claimed compounds of claims 9 and 10.

Applicant's remarks filed on 12/13/2004 become moot due to the new ground of rejections.

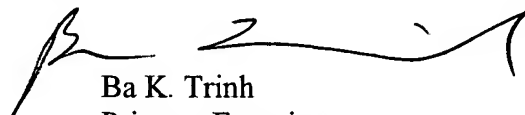

No claim is allowed.
